

Inradoptics

From crystals to metals, solving optical problems with material expertise

Optical Precision in Metal

- Beryllium and AlBeMet™ Specialists
- Aluminum and Stainless
- Electroless Nickel and Gold Plating
- Diamond Turning, Optical Polishing
- Extensive Metrology for Exacting QA
- Aspheres, OAPs, Flats to 20"

Crystal Products and Devices

Crystal Growth and Fabrication:

- LiNbO_3 ZnGeP_2
- KDP KD^*P BBO

Unique Solution Growth Capabilities:

- Proprietary UV Filter Crystals

Crystalline Products and Systems

- Single Crystals with Precision X-ray Orientation
- Pockels Cells
- Harmonic Frequency Conversion Cells

Custom Optics

- Prisms, Beamsplitters, Waveplates
- Transmission Flats and Mirrors
- Lenses and Opto-mechanical assemblies
- Custom X-Ray Crystals and Monochromators
- Plasma Assist and Ion Assist Thin Film Coating
- Optical Contacting
- Prototype to production volumes
